PROJECTS

HILL PALACE MANAGEMENT SYSTEM

3 months

The objective of this project is, gallery system management and web publishing software solution for the finest cultural institutions throughout the world for more years. We dedicated to constantly proving the way organisations manage and share their collections with communities. It was done by VB 6.0 and there using SQL Database.

Android Application For Blind : THIRD EYE

3 months

Our project deals with an android application for blind. The main aim of this application is to help the blind persons to use android devices by vocal control through THIRD EYE the blind use a phone to an extent as normal human being does. The blind can make a call by selecting the contacts, can hear messages received in the phone as voice alert and can check missed calls. This project did by Android 3.0.

Android Application : PlantPort

3 months

The objective of this project is to design an application that deals with the problem of interaction of customer and shop workers in this situation of Corona virus pandemic. It reduces the human effort and one has no fear about the physical interaction. This application aims to provide an online platform for plant lovers. The main purpose is to reduce the time and interaction of a user in a shop. This project aims at automating a plant nursery for smooth working at this particular period of world. Updates and modifications can be easily achieved.
