Visakh Varghese

Software Engineer

I'm passionate about software development, user experience, innovation and exploring new emerging technologies. The primary goal is to add more valuable skills into my closest and showcase them. The area of software developments and operations make me curious, excited to learn more and work hard. I'm a competitive programming and Linux enthusiast. I do have great knowledge of software development life cycle and operations, especially in mobile and web scenarios.

SKILLS

Java | Php | React JS & React Native | JS | Node JS | Python | MongoDB | MySql | Firebase | GIT | Web Designing | Angular | Spring Boot

PERSONAL PROJECTS

Plant Port (11/2020 - 04/2021)
- The objective of this project is to design an application that deals with the problem of interaction of customer and shop workers in this situation of Coronavirus pandemic. It reduces human effort and one has no fear about physical interaction. This application aims to provide an online platform for plant lovers. The main purpose is to reduce the time and interaction of a user in a shop.

Travel Explorer (MERN Stack) (09/2021 - 01/2022)
- This is a web application used to automate all process of the travel and touris which deals with creation, booking and confirmation and user details. Travel and tourism management system is used to book a tour from anywhere in the world by a single dynamic website which will help the user to know all about the places and tour details in a single website. This is developed in React as Front-End and NodeJS as Back-End
